DETAILED ACTION

1. Claims 1-20 are pending in this office action .

RESTRICTION ELECTION

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-9 and 11-19 wire load estimating method, classifiable in class 716 subclass 18.

Group II. Claims 10 and 20, repeater cell inserting method classifiable in class 716 subclass 4.

The invention group I has estimating wire load using synthesized method. The invention group II uses repeater cell inserting method. See M.P.E.P. § 806.05(c).

The inventions are distinct, each from the other because of the following reasons:

- a. These inventions have acquired a separate's status in the art as shown by their different classification and the invention group II does not require synthesized method as recited in the invention group I.

- b. The search required for one Group is not required for the other Groups.

For the reasons above restriction for examination purposes as indicated is proper.

The applicant is requested to cancel the claims of non-selected group.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
